The Bloomfield Record.

The Stevens Battery.

A Sketch of it—Its Cost and Peculiarities.

The famous and world-renowned Stevens battery has been in the course of construction for over a quarter of a century at Hoboken, N. J., having been commenced in 1843 by those widely know and enterprising engineers, Messrs. Robert L. and Edwin A. Stevens.

They were among the pioneers of iron ship-building, and were certainly many years in advance of their cotemporaries in the design of vessels for fast sailing or steaming powers.

In 1843 the proposed to build for the Government a shot-proof vessel, to be used for the defense of New York harbor, of the following dimensions: Length, 250 feet; beam, 40 feet. depth amidships, 28 feet; number of boilers, 4; engines, accessory, 4; condensing, 2; horse power, 900; one propeller and shafting; protection against shot, 4 1-2inches of iron armor. The armament was to consist of seven sixty-four pounders, the heaviest then known. A considerable amount of money and work was put upon the vessel. but in 1851 it was sudently brought to a stand-still by the Government informing the engineers that, in view of the fact of great improvements having taken place in ordnance, the vessel they were constructing wouldn otbe shotproof, and unless they so constructed it, it would not be accepted. This decision of the Government stopped all work, but in 1856 it was resumed and the vessel remodeled upon the followingplan: Length, 415 feet; beam, 48 feet; depth amidships, 32 feet 4 inches; number of boilers, 10; engines, accessory, 9; condensing, 8; horse power, 8,624; two propellers and shafting; protection against shot, 6 3-4 inches of of iron armor. The armament was to consist of five 15-inch guns, weighing twenty-five tons each, and having the power to project a shot of 425 pounds; also two 10-inch rifle guns. From time to the Government made advances of sums which amounted in the aggregate to $500,000.

When the war broke out the builders endeavored to hasten the work, and solicited a further advance of funds from the Government, which was, however, refused, and work was again stopped and remained so until 1871. In that year Mr. Edward Stevens died. His brother died some years previous. The executors of the estate then proceeded to finish the vessel as instructed in the will of Edwin Stevens, and employed Gen. George B. McClellan as engineer-in-chief. After he had made a careful examination he made a report to the trustees that the vessel could not be built upon the specifications and made serviceable. It was then determined to remodel the vessel, which produced the following results: Length, 401 feet; beam, 45 feet; depth, 24 1-2 feet; engines, 4; boilers, 10; horse power, 6,000; a twin screw. It was also intended to place upon it a side armor of iron, 10 inches thick; a deck armor 1 1-2 inches thick, and on the turret 18 inches of solid iron. The side and armor backing is of 4 feet of oak and yellow pine.

The General also added an inner "skin" of iron 1 inch thick. The armament was to consist of two 20-inch smooth bore guns, capable of projecting a solid shot of 1,040 pounds, or two wrought iron 10-inch rifles, throwing a 600-pound shot, capable of penetrating 15 inches of iron.

Its speed is estimated very carefully to be about fifteen knots per hour. The sum already expended upon it has been $2,500,000, and it is calculated that it will require between $300,000 and $500,000 to complete it for service. One of its most remarkable features is the twin screw, which enables it to turn upon its "heel." The workmanship is of the very best, as is also the material; the iron was furnished by the Abbott Iron Company, of Baltimore, Md., and the machinery built by the Delamater Company, of New York.

By virtue of an act of the New Jersey Legislature, of March 27, 1874, it was decided to offer this model and formidable iron-clad for sale, and the Commission to effect the sale consisted of Gov. Joel Parker, Vice Chancellor Amzi Dodd, W. W. Shippen, and S. B. Dod.

The following are the bids on the Stevens Battery, opened at Trenton. The first three bids were for the whole, and the rest for parts: John Roach, $105,000, T. F. Rowland, Greenpoint, $80,850; United States Navy Department (conditional, subject to Congressional appropriation), $125,000; A. McKay, Boston, $50,000; P. H. Wiggings, New York, $60,000; John Stuart, $38,400; P. S. Pifferlee, New York, in part, $45,000; Hoboken Manufacturing Company, $40,000; A Purvis & Co, Philadelphia, $52,000.

The offer of the United States contained a provision that if any foreign nation bid for the battery, the United States would give more than was offered, if Congress confirmed the action of its officers.

Produce of the Earth.—Take the potato away from Ireland, and starvation comes. Famine recently had its hold on Bengal on account of a failure of the rice crop. Bread fruit is to West India both food clothing. Heaven sends it and causes it to grow, and the lazy natives ask nothing further. And yet all these yield to the despised bamboo. We go fishing with these poles: the Chinese eat them. The uses to which it is put render it a national benefactor. Houses, boats, screens and waterwheels are made of it, together with fences, ropes, furniture, hats, umbrellas, and all varieties of weapons, lampwicks, pencils, brushes, pens, aqueducts, telescopes, and a thousand other things, of daily use. We might almost say that were the bamboo to perish suddenly from off the earth the whole Chinese Empire would collapse.

The New York Postoffice.

The new postoffice building in New York city will be opened for business about the first of January, 1875. It is one of the grandest structures in this country. Only a relative idea of the size of the structure can be arrived at by stating that it occupies twenty-one city lots, the frontage on Broadway is 340 feet, on Park row 320 feet, the north, fronting the City Hall 200 feet and the south front 130 feet. This total frontage being equal to about forty city dwellings. It looms up grandly above the adjacent splendid buildings, its graceful facades and noble domes being plainly perceived from the river approaches to the city. To the stranger it is at once a marvel and a landmark.

The slating of the roofs is a particularly satisfactory job, being executed in a superior and somewhat costly article of dressed slate, each slab of which is one-half inch thick at the lower edge and one-quarter inch at the upper, and cut in octagon form at the corners. The slate on this roof weighs in the aggregate some 222 tons.

The stone for the present building is all dressed at the quarry, being cut accurately to specification, numbered and lettered, so that each fits its place perfectly without after dressing. So precisely do these blocks fit that a dozen men at the building lay the stones as fast as they can be prepared by 800 men at the quarry. The completed building is conceded to be the most perfect specimen of granite work in the Union.

About 350,000 cubic yards of granite, 20,000 yards of concrete, 45,000 barrels of cement, 16,000,000 bricks and 9,500,000 pounds of iron have been used in the construction. It has already cost over $5,000,000. The rapidity with which this great work has been pushed is deserving of all praise. Ground was broken in the fall of 1869, but the work was constantly embarrassed up to 1872 by the lethargy of Congress. Since that time, however, the work has not lagged for a day, and, as before stated, the building will probably be occupied by the department as early as New Year's Day of 1875. Mr. A. B. Mullett, the Supervising Architect of the government, perfected the plans, Mr. C. S. Hulburd is the superintendent and Mr. W. G. Steinmetz assistant superintendent, and inspector of material.

A Substitute for Ivory.—A substance under the name of celluloid, the invention of Mr. Hyatt of Albany, originally intended as a subsitute for ivory in the manufacture of billiard balls, possesses qualities which render it applicable to a great variety of manufactures. As originally prepared it consisted of a combination of soluble cotton and ether or alcohol, but it was subsequently ascertained that a still more satisfactory result could be obtained by the addition of camphor to the alcohol; and, finally camphor alone was mixed with the ground cotton pulp, which hardens in drying and becomes "celluloid." This substance—which is maintained by the inventor to be a truly chemical compound and not a mechanical mixture—can be colored in any way desired. The varying degrees of solidity and flexibility required are obtained by the different proportions of the camphor. The substance is naturally of a pale amber color, but may be made of any tint by the application of mineral pigments or dyes soluble in alcohol, or any of the aniline colors may be employed.

Calluloid is hard and elastic, ranging in hardness from that of iron to ivory. It is as tough as whalebone, elasticity being one of its most prominent characteristics. In this respect it greatly exceeds ivory. It makes good insulators for knobs of telegraphic instruments, for insulating posts for electrical machines, and for telegraphic wires; although a good non-conductor it is not perceptibly electric. It is well adapted to the manufacture of combs, and is largely used in the preparation of dental plates, as it can be made of precisely the color of the palate and gums. At a temperature of 250° to 300° it can be molded into any desired form. Several companies have been started for the manufacture of different objects from celluloid; two in Newark, and several others in Philadelphia, New York, and elsewhere.

A Queer Cookery Book.—It is in reality a cookery book, written in a novel fashion, with the idea of supplying spiritual nutriment while suggesting dishes for the table. The result is sometimes comical. A bill of fare is given for every day in the year, prefaced by a motto which the lady may ponder before ordering dinner. On one day, the dinner, which is to consist of mixed soup, neck of veal braized, vegetable and lemon custard, is prefaced by the exclamation, "Quench, oh, quench not that flame of love! it is the breath of your being." On another date, when the lady is to provide broiled brill, roast fowl and pattypan puddings, she is invoked in these words of Sir Philip Sidney's: "Dost thee love me? keep thee then still worthy to be loved." On another occasion, while reading how to cook oyster omelet, stewed brisket of beef, vegetable marrow and baked arrowroot pudding, the lady is reminded that "the heart of a young woman in love is a golden sanctuary which often enshrines an idol of clay." It is a little droll to read in one line how for two congenial hearts marriage has no unpleasant side, and from the text to learn the best way of cooking a herring. The affecting words, 'My own! my own! oh, breathes there one to whom that simple word's not dear?" are immediately followed by advice to "Cut the fish open sufficiently to empty the inside; remove the roes, and thoroughly wash them and the mackerel."—*Pall Mall Gazette.*

A chain of compressed cakes of guncotton tied around the trunk of a large tree and exploded will cut it down instantly by the violence of its action. The cut through the trunk is as sharp as that made by the keenest axe.

Twenty-one Impolite Things.

1. Loud and boisterous laughing.
2. Reading when others are talking.
3. Reading aloud in company without being asked.
4. Talking when others are reading.
5. Spitting about the house, smoking or chewing.
6. Cutting finger nails in company.
7. Leaving church before worship is closed.
8. Whispering or laughing in the house of God.
9. Correcting older persons than yourself, especially parents.
10. Leaving a stranger without a seat.
11. Gazing rudely at strangers.
12. A want of respect and reverence for seniors.
13. Receiving a present without an expression of gratitude.
14. Making yourself hero of your own story.
15. Laughing at the mistakes of others.
16. Joking others in company.
17. Commencing talking before others have finished speaking.
18. Answering questions that have been put to others.
19. Commencing to eat as soon as you get to the table.
20. Not listening to what one is saying in company.
21. Lounging around where your room is better than your company.

How Statues are Made.—The bronze statuary just now so popular, is manufactured by a simple enough process. Over the clay model is poured a coating of plaster Paris, which having been allowed to set, is taken off in sections, thus affording a hollow mould of the figure. From such a mould is produced a stucco duplicate, either of the entire statue or of such a portion thereof as is intended to be cast at a time, and on this again is formed a second mould of greater thicknesss and solidity for the reception of molten metal. The material used for the final mould is a composition of stucco and brick dust. This is applied in a plastic state to the stucco model, from which its inner surface takes the form of the figure. Were statues cast solid, it would now only be necessary to separate mould from model, and run metal into the former till its interior was filled. This, however, would involve waste, and in order to economize material a solid core is placed inside the mould, leaving only such space all around as will receive the thickness of metal deemed necessary for the work in hand. The mould with its core having been thus completed and firmly hooped round with bands of iron, is placed in a kiln to bake to perfect dryness. This precaution is necessary from the circumstance that even a trace of moisture might on the application of molten metal occasion a dangerous explosion. In the case of the casting now in question the drying of the mould occupies some weeks. On the removal from the kiln the mould is buried in dry earth below the floor of the foundry, only the aperture for receiving the metal and the vent-hole for the escape of air remaining visible.

Wisps.

—Which times are the best? Meal times.

—Ignorance is the wet nurse of prejudice.

—One bad thing about gold—Not having it.

—Domestic broils make unsatisfactory meals.

—An Oregon blacksmith is a "horse jeweler."

—"Arose" by any other name would be "got up."

—A musician is an airy fellow; but he can't help it.

—One way to get a roaring trade is to buy a menagerie.

—A friend that sticks in prosperity and adversity —Mucilage.

—What is better than a promising young man? A paying one.

—A man cannot expect half a loaf when he loafs all of the time.

—When is money damp? When it is dew in the morning and mist at night.

—If you want to know whether your grandmother was cross-eyed, or where your great uncle stood in his arithmetic class, just run for office, and you'll know it all.

Well Indorsed.—The Gift Concerts in aid of the Kentucky Library are not at all speculative. This institution is chartered by the State of Kentucky. The first prize in the next drawing, which takes place November 30, is $250,000. It is a reliable institution, and some one will get that money. And that there may be no doubt as to the honesty of its management we cite the fact that the best banks in Louisville indorse it, and that Governor Thomas E. Bramlette, of Louisville, is the general manager. An institution so fathered is certainly deserving of confidence.

UNPAID TAXES OF BLOOMFIELD FOR the year 1873.

NOTICE.—Whereas, the following mentioned taxes were assessed for the year 1873, against the following persons, and upon the following described lands and real estate, situated in the township of Bloomfield, in the county of Essex, and State of New Jersey; and whereas, the said taxes remained unpaid on the twentieth day of October, A. D. 1873, and remain unpaid now, therefore, I the undersigned Collector of Taxes for said township, do hereby give notice that, unless the said taxes, together with interest thereon, and all costs and fees, shall be paid to me at my office, over Madison's Market, in said township, within sixty days after the first publication of this notice, I shall proceed on Tuesday, the sixth day of December next ensuing, between the hours of two and five o'clock in the afternoon of that day, at Archdeacon's Hotel, in said township, to make sale of the several parcels of the said lands and real estate, according to the provisions of the supplement to an act to authorize the sale of Real Estate for the payment of taxes, approved March 17, 1854, which supplement was approved March 26, 1873, for the sale of real estate of any person or persons residing in this State or of any corporation of this State for unpaid taxes, in the same manner as real estate of persons residing out of this State or foreign corporations located outside of the county in which the land is located is now sold for taxes:

IRA CAMPBELL, Collector.

Dated Bloomfield, N. J. October 9th, 1874.

SHERIFF'S SALE.—In Chancery of New Jersey.—Between Frances A. Lord, complainant, and Harriet Stocking, defendant. Fi. Fa., for sale of mortgaged premises.

By virtue of the above stated Writ of Fieri Facias to me directed, I shall expose for Sale by Public Vendue, at the Court House, in Newark, on Tuesday, the eighth day of December next, at Two o'clock, P. M., all that Tract or Parcel of Land and Premises, situated in the Township of Montclair, Essex County, New Jersey:

Beginning on the easterly side of the road leading from Montclair to Paterson (now called the Valley road) and at the southwest corner of lands of Nancy Andruss formerly belonging to Jacob F. Meyer and thence along said road south forty-one degrees west three chains and sixty-nine links; thence south fifty-four degrees and forty-five minutes east eleven chains and eighty-eight links; thence north thirty-five degrees east three chains and seventy-eight links to the line of said Nancy Andruss' and; thence along the line thereof north fifty-five degrees and thirty minutes west eleven chains and fifty links to the place of beginning, including one half of the said road, containing four acres and seventeen hundredths of an acre, excepting therefrom the following described part thereof: Bounded eastwardly by the westerly side of Central avenue south-westwardly by the lands of the Montclair Railway Company purchased of Albert Pearce northwardly and southwardly by lines parallel with and fifty feet distant at a right angle from the located centre line of the Railway of said Company as said Railway is now being built and containing about one-third of an acre.

Newark, N. J., October 6, 1874.

JAMES PECKWELL, Sheriff.

SHERIFF'S SALE.—In Chancery of New Jersey.—Between W. J. Williamson, complainant, and Jos. P. Hague et. als., defendants. Fi. Fa., for sale of mortgaged premises.

By virtue of the above stated writ of fieri-facias to me directed, I shall expose for sale by public vendue, at the Court House, in Newark, on Tuesday, the eighth day of December next, at two o'clock, P. M., all that tract or parcel of land and premises, situated in the township of Bloomfield, Essex County, New Jersey:

Beginning on the centre line of Williamson Avenue where it intersects the northerly line of the Montclair Railway; thence (1) along the centre line of said Williamson avenue north thirty minutes west six hundred and fifty feet one inch to the range of the line of Ely Drew's lot; thence (2) from the centre of said Williamson avenue and along said Drew's line north eighty-nine and a half degrees east one hundred and eighty feet to the corner of lands of Henry O. Dodd; thence (3) along said Dodd's line south thirty minutes east fifty feet; thence (4) still along said Dodd's line south eighty-five degrees east one hundred and fifty-one feet; thence (5) still along the same north thirty minutes west one hundred and thirty-seven feet six inches to Belleville avenue; thence (6) along Belleville avenue south sixty-seven and three-quarters degrees east thirty feet; thence (7) in a southerly direction and nearly at right angles to said last mentioned course and parallel with Williamson avenue aforesaid eight hundred and fifty feet more or less to the northerly line of the Montclair Railway; thence (8) along the northerly line of said Montclair Railway to the place of beginning, being part of the premises conveyed to Joseph P. Hague by William J. Williamson and wife, this mortgage being given to secure a part payment of the consideration money mentioned in said deed, this description being intended to cover that portion of said premises known as the first tract in said deed.

Newark, N. J., October 6, 1874.

JAMES PECKWELL, Sheriff.

ADMINISTRATORS' SALE.—In pursuance of an order of the Orphans' Court of the County of Essex, made on the fourteenth day of July, A. D., 1874, the subscribers, administrators of Martin Croughan, deceased, will sell by public vendue, on the premises hereinafter described, on Wednesday, the sixteenth day of December next, at the hour of two o'clock, in the afternoon, all that tract of land and premises situated in the township of Bloomfield, Essex County, New Jersey:

Beginning at a point in the Newark and Pompton Turnpike, one hundred and seventy feet distant from the lot owned by Horace H. Ward, deceased; thence running north fifteen degrees and forty-five minutes west one hundred and forty-five feet to a line (in the middle of Second river,) running from the centre of the bridge on said turnpike to the centre of the bridge on the old road; thence south eighty-two degrees and thirty minutes east one hundred and eighty-nine feet; thence south nine degrees and fifteen minutes east seventy-two feet and two inches; thence south seventy-four degrees and forty-five minutes west one hundred and sixty-seven feet to the place of beginning, being the same premises conveyed to said Martin Croughan, deceased, by deed recorded in Book M 16, page 138, &c., of deeds for said Essex County.

Dated Oct. 9, 1874.

THOMAS McGOWAN,
FRANCES CROUGHAN.

SHERIFF'S SALE.—Essex Circuit Court.—Waterbury Brass Company vs. Edward Moran.—Fi. fa., &c. New Jersey Supreme Court—John S. Willis vs. Edward Moran.—Fi. fa., &c.; Oliver S. Hooper and al. vs. Edward Moran.—Fi. fa., &c. Essex Circuit Court—Frederick J. Richters vs. Edward Moran.—Fi. fa., &c; Samuel C. Munn vs. Edward Moran.—Fi. fa., &c.

The sale of property in the above stated case stands adjourned until Tuesday the twenty-second day of December next, at 2 o'clock P. M. at the Court House in the city of Newark.

JAMES PECKWELL, Sheriff.

Newark, N. J., October 27, 1874.

Miscellaneous Advertisements.

THE SUN.

Weekly and Daily for 1875.

The approach of the Presidential election gives unusual importance to the events and developments of 1875. We shall endeavor to describe them fully, faithfully, and fearlessly.

THE WEEKLY SUN has now attained a circulation of over seventy thousand copies. Its readers are found in every State and Territory, and its quality is well known to the public. We shall not only endeavor to keep it fully up to the old standard, but to improve and add to its variety and power.

THE WEEKLY SUN will continue to be a thorough newspaper. All the news of the day will be found in it, condensed when unimportant, at full length when of moment, and always, we trust, treated in a clear, interesting and instructive manner.

It is our aim to make the WEEKLY SUN the best family newspaper in the world. It will be full of entertaining and appropriate reading of every sort, but will print nothing to offend the most scrupulous and delicate taste. It will always contain the most interesting stories and romance of the day, carefully selected and legibly printed.

The Agricultural Depart ment is a prominent feature in the WEEKLY SUN, and its articles will always be found fresh and useful to the farmer.

The number of men independent in politics is increasing, and the WEEKLY SUN is their paper especially. It belongs to no party, and obeys no dictation, contending for principle, and for the election of the best men. It exposes the corruption that disgraces the country and threatens the overthrow of republican institutions. It has no fear of knaves, and seeks no favors from their supporters.

The markets of every kind and the fashions are regularly reported in its columns.

The price of the WEEKLY SUN is one dollar a year for a sheet of eight pages and fifty-six columns. As this barely pays the expenses of paper and printing, we are not able to make any discount or allow any premium to friends who may make special efforts to extend its circulation. Under the new law, which requires payment of postage in advance, one dollar a year, with twenty cents the cost of prepaid postage added, is the rate of subscription. It is not necessary to get up a club in order to have the WEEKLY SUN at this rate. Anyone who sends one dollar and twenty cents will get the paper, post-paid, for a year.

We have no traveling agents.

THE WEEKLY SUN.—Eight pages, fifty-six columns. Only $1.20 a year, *postage prepaid. No discounts from this rate.*

THE DAILY SUN.—A large four-page newspaper of twenty-eight columns. Daily circulation over 120,000. All the news for 2 cents. Subscription, postage prepaid 55 cents a month, or 6 50 a year. To clubs of 10 or over, a discount of 20 per cent. Address, "THE SUN." New York City.

A NEW CHROMO FOR 1875.

Medicinal.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Vinegar Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vinegar Bitters in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs in Bilious Diseases.

The properties of Dr. Walker's Vinegar Bitters are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irritant Sudorific, Alterative, and Anti-Bilious.

Grateful Thousands proclaim Vinegar Bitters the most wonderful Invigorant that ever sustained the sinking system.

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Bilious, Remittent and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegar Bitters, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with Vinegar Bitters. No epidemic can take hold of a system thus fore-armed.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Diseases, Walker's Vinegar Bitters have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of Walker's Vinegar Bitters occasionally.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no anthelmintics will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
